

# ETHYLENE MANUFACTURING COURSE

February 5-7, 2019

Sugar Land, TX, USA

**Course content covered over 3 days:** provides comprehensive coverage of ethylene technology with special emphasis on process operation, control and troubleshooting. The course provides an excellent opportunity to develop a working knowledge that can promote efficient, reliable and trouble-free operation and a complete understanding of the process.

**Easy to follow:** for those new to the industry and serves as comprehensive refresher and update for experienced professionals involved in the ethylene manufacturing and businesses. The course offered is practical and down-to-earth and for wide range of job functions.

The course material, layout and coverage are based on the instructor's decades of experience.

## Benefits of Course

- ✓ Understanding Ethylene Process Technology
- ✓ Gain Insights into the Overall Performance, Cost of Production
- ✓ Understanding Key Equipment and Performance Parameters
- ✓ Learn about Optimum Process Operation and Control
- ✓ Understanding Process Safety
- ✓ Help Achieve Reliable, Safe & Trouble-free Operation

## Who Should Attend

- ✓ Process Engineers
- ✓ Operation Engineers
- ✓ Technical Services
- ✓ Production Supervisors, Engineers
- ✓ Mechanical Engineers
- ✓ Process Control
- ✓ Business Development
- ✓ Analysts

# ETHYLENE MANUFACTURING COURSE

February 5-7, 2019

Sugar Land, TX, USA

**Receive expert content:** You will receive a complete set of course material that will serve as a text during the course and as a reference for your future use.

The course is presented in a highly participative discussion format.

**Registration and breakfast** starts at 7:15AM on Day One. The course will run for three days, starting daily at 8AM and finishing at 5PM. Breakfast, coffee breaks and lunch is included each day.

---

## *Course Outline*

*Overview – History, Supply/Demand, Value Chain, Production Routes*

*Performance & Economic – Key performance data, cost of production*

*Technology – Cracking Furnaces, Processing Sequence, C4s and Pygas*

*Key Equipment – Design requirements & Performance*

*Operation & Process Control – Operating parameters and interdependencies, process control and handles for optimizing operation for improved performance and economics*

*Process Safety – key aspects*

*Asset improvement & troubleshooting*

---

## TRAINING

### INHOUSE TRAINING

We offer a variety of onsite courses designed together with our clients to meet your specific needs. We can tailor our courses to a specific technology or purpose for your site.

### COURSE INSTRUCTOR

The course is conducted by Sanjeev Kapur. He is a recognized industry expert in ethylene and related technologies. His expertise cover a vast background and hands-on experience in technology know-how, design, engineering, operation, troubleshooting and technical risk evaluation/mitigation. He has contributed a chapter on Ethylene Technology in McGraw Hill's "Handbook of Petrochemical Production Processes" and a section on Ethylene and Propylene for ENI Encyclopedia of Hydrocarbons. He has presented and published over 40 technical articles.
